CAREER OBJECTIVE

Aspiring Cybersecurity professional and Computer Engineering student with hands-on experience in penetration testing, security tooling, network analysis, and ethical hacking. Proficient in vulnerability assessment, security-focused development, and threat detection. Seeking a cybersecurity internship to apply practical skills in real-world security operations and secure application development.

EDUCATION

A.D. Patel Institute of Technology

2023 – Present | Anand, Gujarat

B.Tech in Computer Engineering – C.V.M. University | CPI: 9.03

Knowledge Highschool, Bakrol

2023 & 2021 | Gujarat

12th (GSEB) – Percentile: 92.15% | 10th (GSEB) – Percentile: 93.00%

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, C++

Web Development: HTML, CSS, React.js, Node.js, Express.js

Cybersecurity: Networking, Penetration Testing, Network Scanning, Phishing Analysis, RDP Tools, Wordlist Generation

Tools & Platforms: Git, GitHub, Vercel, Firebase, Burp Suite, Nmap, Wireshark, Linux (Kali)

Databases & CS: MySQL, Firebase, Data Structures & Algorithms, OOP, Operating Systems

KEY PROJECTS

Cybersecurity Toolkit for Kali Linux

March 2025

Python, Bash, Linux

- Built a CLI-based penetration testing toolkit covering recon, attack simulation, and data protection — integrating Network Scanner, Phishing Tool, URL Inspector, Secure File Sharing, and Wordlist Generator (CUPP).
- Designed a modular, menu-driven architecture for streamlined installation and execution of each security utility on Kali Linux.

AI-Enabled Interview Platform & Personality Analyzer

Feb 2026

Next.js, TypeScript, Firebase, Gemini AI API

- Engineered secure user authentication and multi-user session management using Firebase, ensuring data privacy and protection across user environments.
- Applied AI-driven API integration with controlled data handling — demonstrating skills in building systems with secure data flow and access management.

AI Travel Planner

Jan 2026

JavaScript, REST APIs, Firebase

- Implemented Firebase-backed authentication and secure API communication, applying best practices for user data protection and access control.
- Integrated third-party APIs with input validation and secure data flow to prevent unauthorized access.

CERTIFICATIONS

Certificate in Ethical Hacking and Security | Cyber Security India (CSI) | May 2024

Pre Security | TryHackMe | March 2025

Cyber Security 101 | TryHackMe | July 2025
